Milestones

New Boston was saddened by the sudden death of its junior Selectman, Leroy Lowell, having only served eight months of his three-year term. Donald Byam was appointed to fill this office until Town Meeting of 1981.

The Town of New Boston had the honor of receiving a campaign visit at a rousing Political Rally from Presidential Candidate, Ronald Reagan, the night before the Primary Election.

We also had the pleasure of a public meeting at the town hall from George Bush, who has now been elected Vice President.

On April 30th, Betty Hooper resigned as Tax Collector after serving this office for the past sixteen years. Sandra Gendron, Town Clerk, was appointed to finish out the term which expires in March of 1981.

Bernice Pelchat, Town Treasurer, also resigned from office, whereupon Karen Craven was appointed to finish out this term which expires in March 1981.

A new Town Highway Shed was erected on Old Coach Road at the site of the old town dump.

The old Railroad depot was renovated into a Police Station.

New Boston lost its native World War I veteran when Frank Wilson passed away in May at the age of 85. In March he had become a 60-year member of the American Legion.

A new fiberglass flagpole was erected on the Town Common in time for the Memorial Day exercises.

Funds from the River Road Project were used to beautify and increase the serviceability of the spring located on River Road. A contest was held for the naming of this project. A plaque was erected calling the site the RIVER ROAD SPRING.

DONALD PROUTY, Alternate	One Year Term

MINUTES OF TOWN MEETING — MARCH 11, 1980

The Meeting was called to order at 10:00 a.m. by Moderator David L. Nixon. The Lord's Prayer was led by Supervisor of the Checklist, Donald E. Byam, and Chairman of the Board of Selectmen, Roland Sallada led the assembled group in the Pledge of Allegiance.

Articles 1 & 2 of the 1980 Town Warrant were read by the Moderator. The polls were opened at 10:05 a.m., and work commenced under these articles. The remainder of the Warrant was to be acted upon at 7:00 p.m.

Article 1. "To choose all necessary officers for the ensuing year."

Town Officers:

Selectman for three years	LeRoy Lowell
Trustee of Library for three years	Reginald F. Hayes
	Carolyn H. Todd
Trustee of Library for two years	Paul Stanger
Trustee of Trust Funds for three years	David D. Campbell
Road Agent for one year	Almus Chancey
Auditor for two years	Howard F. Kane
Fire Ward for seven years	Harold C. Strong
Supervisor of Checklist for six years	Patricia S. Wason
Moderator for two years	David L. Nixon

School District Officers:

Clerk for one year	Nonah A. Poole
Moderator for one year	David Woodbury
Treasurer for one year	Patricia Getman
School Board Member for three years	Gail Parker
Auditors for one year	Gary Luneau
	Simone Hunter

Article 2. "Shall we adopt the provisions of RSA 654:34-a permitting applications for changes in party affiliation to be made with the Town Clerk?"

315 YES

31 NO

The polls were closed at 7:08 p.m. by Moderator David L. Nixon and the evening business meeting commenced. The Lord's Prayer was led by retiring Supervisor of the Checklist, Shirley Elliott; and retiring Chairman of the Board of Selectmen, Roland Sallada, led the group in the Pledge of Allegiance.

A report was then given by Roland Sallada, Representative to the General Court, as to what was going on in the Legislature which might be of interest to the citizens of New Boston.

Moderator Nixon then introduced the Officers of the Town of New Boston, including Chairman of the Board of Selectmen, Roland Sallada, Selectman Thomas Mansfield, Selectman Merrill Todd, Town Clerk Sandra Gendron, Deputy Town Clerk Karen Craven, Supervisors of the Checklist, Donald Byam, Shirley Elliott, and Sandra Gallup; Ballot Clerks, Evelyn Barss, Rhoda Hooper, Ruth Dodge and Lucie Dickerman; Tax Collector and Secretary to Selectmen, Beatrice Hooper; Police Officer George Peirce and Treasurer Bernice Pelchat.

Supervisor of the Checklist Donald Byam then gave an explanation of what it would mean to be able to change party affiliation with the Town

Clerk during her office hours 90 days prior to an election commencing January 1, 1981, if the vote on Article 2 were in the affirmative.

Mr. Byam then presented Shirley Elliott with a plant in appreciation of her work as a Supervisor of the Checklist for the past fifteen years, as she was not seeking re-election. Mrs. Elliott was accorded a standing vote of thanks by the citizens of New Boston.

Selectman Mansfield presented Mrs. Marion Sallada with a corsage; and a Certificate of Appreciation was presented to Roland Sallada who was retiring after serving fifteen years as a Selectman. Mention was made of the many offices he had held in New Boston and of the many organizations he had been active in over the years. Mr. Sallada was also presented with a small gold gavel commemorating his years as Town and School District Moderator. Mr. and Mrs. Sallada were also given a standing ovation by the townspeople present.

Moderator Nixon explained the ground rules which would be followed during the meeting and read portions of the state laws pertaining to Town Meetings, explained the use of a written ballot, questioning a vote, or asking for a division of the house, and the procedure used to move a question. Finance Committee member Elliott Hersey said the Finance Committee would be using a blackboard to keep track of the money articles voted in the affirmative showing the probable effect they would have on the tax rate.

Work then commenced under Article 3.

Article 3. To raise such sums of money as may be necessary to defray town charges for the ensuing year and make appropriations of the same.

1. For Town Officers' Salaries	\$ 5,850.00
2. For Town Officers' Expenses	14,000.00
3. For Legal Fees	1,500.00
4. For Election and Registration	1,200.00
5. For Town Hall and Town Offices	11,000.00
6. For Police Department	14,949.00
7. For Fire Department	18,635.00
8. For Costs of Fires	2,500.00
9. For Forest Fires	200.00
10. For Planning Board	300.00
11. For SNHPC	642.60
12. For Board of Adjustment	50.00
13. For Work on Tax Base Map	500.00
14. For Civil Defense	100.00
15. For Monadnock Visiting Nurse	100.00
16. For Vital Statistics	50.00
17. For Town Dump	7,500.00
18. For Summer Maintenance, Highway	30,000.00
*19. For Additional Highway Subsidy	17,450.27
20. For Winter Maintenance, Highway	35,000.00
21. For Resurface Tarred Roads	10,000.00
22. For General Expense, Highway	12,000.00
23. For Street Lighting	3,500.00
24. For Library	9,832
25. For Old Age Assistance	100.00
26. For Memorial Day	350.00
27. For Care of Town Land	1,000.00

28. For Forestry Committee	50.00
29. For Recreation Commission	500.00
30. For Support of Cemetery	800.00
31. For Social Security	4,500.00
32. For Unemployment Compensation	200.00
33. For Principal on Long Term Note	22,500.00
34. For Payment of Interest	1,907.22
* — Appropriated only.	

The sub-sections of Article 3 were all voted in the affirmative as printed in the Warrant, after having been duly moved and seconded, with the exception of sub-section 24 For Library which was reduced from \$10,082.00 to \$9832.00. The reduced amount was moved by Dr. Samuel Brooks, seconded by Selectman Mansfield, and voted in the affirmative.

Article 4. To see if the town will vote to raise and appropriate the sum of \$1,762.12, the State to contribute \$11,747.44, for Town Road Aid, or act in relation thereto.

A motion was made by Selectman Sallada and seconded by Donald Byam to vote the Article as printed. The Article passed as printed.

Article 5. To see if the town will vote to raise the sum of \$67,892.56 and to withdraw and appropriate from the Fire Equipment Capital Reserve Fund \$28,357.44 plus interest, making a total of \$96,250.00 for the purchase of a new fire truck, attack pumper, or act in relation thereto.

The Article as printed was so moved by Fire Chief James Dodge and seconded by Kenneth Barss. Chief Dodge stated the need for the truck and that its purchase would phase out one current piece of equipment. Fireman John Bunting gave a ten-year plan which the Fire Department hoped to follow in the phasing out and purchasing of equipment. The life expectancy of the proposed vehicle was estimated to be 20 years. Selectman Mansfield explained the plan for financing by the Selectmen. The Fire Department would take delivery in 1981 and pay for the truck in full at that time. The proposed money would not affect the tax rate until 1982, at which time the town loader and the ambulance would be paid for, and monies now being used to pay for these pieces of equipment would then be used to pay for the proposed truck. Chief Dodge assured those present that a contract would be signed ordering the proposed truck thus insuring the proposed purchase price of the vehicle. The vote by those assembled was unanimously in favor of the motion to purchase the fire truck.

Article 6. To see if the town will authorize the Selectmen to issue long term notes to cover any appropriations made under Article 5, or act in relation thereto.

The Article was so moved by Selectman Sallada, seconded by Selectman Mansfield, and approved unanimously by those present.

Article 7. To see if the town will vote to raise the sum of \$124,800 and to withdraw and appropriate from the Library Capital Reserve Fund \$7,000 plus interest, making a total of \$131,800, for the proposed addition to the Whipple Free Library, or act in relation thereto.

Dr. Samuel Brooks amended said motion to read to see if the town will vote to raise the sum of \$95,000 and to withdraw and appropriate from the Capital Reserve Fund \$7,000 plus interest, making a total of \$102,000 for the proposed addition to the Whipple Free Library, or act in relation thereto which amendment was seconded by Enid Spielman. Dr. Brooks went on to explain the present situation of the library, the overload of

books, building repairs and improvements needed and the increased usage of the facility. He further stated that there was approximately \$4,000 in the building fund, that the land on which the proposed addition would be built had been donated by Mr. and Mrs. Randy Parker, that approximately \$13,000 had already been collected in a fund raising effort, and that these efforts would continue. Because of the close proximity of the river to the addition he assured those present that the slab foundation would be well above the flood level. Much discussion ensued as to the pros and cons of the proposed addition including the crowding caused by the library's use by the school, which does not have its own facility, the effect the proposed amount of money would have on the tax rate, (an explanation of which was offered by John Young, member of the Finance Committee) and the advisability of waiting for a master plan to be completed which would show projected needs of Town Services as the population increases. Linda Rollins moved the question, seconded by John Young, the motion was adopted. A petition for a written ballot on this Article was presented to the Moderator with the required number of signatures. The results of the written ballot were 129 opposed, and 104 in favor, of the article as proposed by Dr. Brooks; thus it was defeated.

Article 8. To see if the town will authorize the Selectmen to issue long term notes to cover any appropriations made under Article 7, or act in relation thereto.

A motion to indefinitely postpone action on this Article was made by Selectman Sallada, seconded by Selectman Mansfield, and so voted by the group.

Article 9. To see if the town will vote to accept any forthcoming gifts to the Building Fund for the Whipple Free Library addition in the coming years, to be applied toward the payment of principal and interest on any serial notes or bonds authorized under the previous Article, or act in relation thereto.

A motion was made by Selectman Sallada to see if the town will vote to accept any forthcoming gifts to the Building Fund for the Whipple Free Library addition in the coming years, seconded by Richard Moore, and so voted.

Article 10. To see if the town will vote to raise and appropriate the sum of \$5,000 for repairs to the Town Hall, or act in relation thereto.

The motion for approval was made by Howard Towne and seconded by Daniel Towne. Linda Rollins wanted assurance that this money would only be spent in the Town Hall and not the Town Offices. She was so assured by Howard Towne, a member of the Town Hall Committee. Donald Byam inquired as to whether this money could come from the sale of timber on the Lydia Dodge Lot as it had in previous years. Selectman Mansfield replied that the Forestry Committee had not recommended a timber cut from the Dodge Lot so the answer was no. When voted on the Article was passed.

Article 11. To see if the town will vote to raise and appropriate a sum not to exceed \$15,000 for conversion of the existing west lower School District Building to provide office space for the use of the Police Department, or act in relation thereto.

This article was so moved by Police Chief John Ballou and seconded by Frederic Cutting. Chief Ballou then offered an amendment which reads "I move that Article 11 be amended by striking same in its entirety

and substituting the following therefore: To see if the town will vote to raise and appropriate a sum not to exceed \$15,000 for conversion of the existing Railroad Depot Building to provide office space for the use of the New Boston Police Department, provided said use is approved by the New Boston Playground Association, or act in relation thereto." This was seconded by Frederic Cutting. LeRoy Lowell stated that the Playground Association would have to meet in order to approve the proposed use of the Depot Building. There was some question if the amendment offered by Chief Ballou was in order without previous approval of the Playground Association. The Moderator ruled the amendment in order because the proposed amendment and money to be raised and appropriated was contingent on approval of the Playground Association and without this approval no money would be forthcoming. Chief Ballou explained the proposed conversion, and when asked why the proposed site for Police Department use had been changed from that originally printed in the Town Report, replied that considerable opposition had been expressed to the use of the school building for police work due to its proximity to the elementary school now in use. The question was moved by Richard Beauchemin, seconded by Clovis Gentilhomme, and so voted. The voice vote that followed was in doubt by the Chair, and a division vote was called for, the results being 138 yes and 45 no. The amended version of Article 11 thus passed.

Article 12. To see if the town will vote to raise a sum not to exceed \$20,000 and withdraw and appropriate the sum of \$20,000 from Revenue Sharing Funds established under the provisions of the State and Local Assistance Act of 1972, making a total not to exceed \$40,000, to build a new Town Highway garage, or act in relation thereto.

A motion was made by Selectman Mansfield and seconded by Selectman Todd for approval of this Article. Selectman Mansfield explained that the site of this proposed building would be the former dump on Old Coach Road, further explaining features to be incorporated in the proposed building and various basic construction materials that had been considered by the Board. He further stated that the Board had received quotes ranging from \$26,500 to \$32,000, and if the Article was approved the building would go out for bid. The balance of the money asked for in the Article would be used for such items as a well, site preparation, and septic systems, etc. It was also stated by the Board that the present building used to house town equipment would be sold and the money put into the general funds for the use of the Town. Selectman Mansfield stated that the \$20,000 raised by the Town would not be on a long term note, and so would affect the tax rate this year. The Article was then put to a vote, and it passed.

Article 13. To see if the town will vote to raise and appropriate the sum of \$2500 to update the real estate assessments, work to be done by the State Tax Appraisers, or act in relation thereto.

The motion was made to adopt the article by Selectman Todd and seconded by Selectman Mansfield. Selectman Todd explained that the State would come in to update the reassessing of the Town which they had completed last year, for this sum of money. He further stated that by an annual vote of the Town Meeting this procedure could be continued for a period of five years, he assumed it would be time for a new contract for re-evaluation at the end of this five years. The Article was passed.

Article 14. To see if the town will vote to appropriate the sum of \$22,000 to contract with the Southern New Hampshire Planning Commission for the purpose of preparing a Master Plan under the guidance of the New Boston Planning Board and to raise \$11,000 to finance the first year's cost, or act in relation thereto.

Selectman Mansfield moved to see if the Town will vote to raise and appropriate \$11,000 for the purpose of preparing a Master Plan with the assistance of the Southern New Hampshire Planning Commission. This was seconded by Ella Daniels. Discussion ensued as to the necessity of a Master Plan and benefits thereof. It was explained that much of the work involved would be done by the Planning Board and the formation of a citizens committee and only the assistance of the SNHPC was involved. Dr. Samuel Brooks and Harold Strong, members of the New Hampshire Planning Board, pointed out the amount of work to be done and strongly urged citizen volunteers, which would help defray the costs of a Master Plan. The question was moved by Richard Beauchemin, seconded by Wayne Daniels and so voted. The Article as offered by Selectman Mansfield was then adopted by a majority of those present.

Article 15. To see if the town will vote to make Mountain Road one-way in a southeasterly direction from the Broman residence in the town of Lyndeboro, to the intersection of Lyndeboro Road in the town of New Boston, or act in relation thereto.

A motion was made by Theodore Olson, seconded by Roland Sallada to adopt the printed Article. Selectman Sallada explained that this Article was placed in the New Boston Warrant at the request of the Town of Lyndeboro and that the wording also appeared in the Town of Lyndeboro Warrant. It was further explained that there were no New Boston residents living on the piece of road in question, and that there was a dangerous situation caused when two cars meet, especially on the hill on the road. Concern was expressed as to the precedent set by voting this Article, would other roads in the future be subject to this type of Article? Again it was stressed that only Lyndeboro residents would be affected by the passage of this Article, and that the Article would have to be favorably voted in both towns to be effective. The question was moved by Jay Marden, seconded by Clovis Gentilhomme, and so voted. Voice vote of the Article as printed left the Chair in doubt, a division was called for and the results were: 88 yes, 34 no. The Article was thus adopted.

Article 16. To see if the town will vote to amend the Ordinance Providing for the Regulation of Private Dumps, as follows:

On Page 1, Paragraph 3, starting on line 5, delete "Chapter 267 of the New Hampshire Revised Statutes Annotated of 1955 (267:1 Definitions.)"

Then on line 12, following the word "vehicles", delete the words "which are no longer intended or in condition for legal use on the public highway." Change to "which are not in condition for legal use on public highways."

Page 2, Paragraph A, the first sentence to read "The Selectmen, upon written application and payment of \$25.00 fee."

Page 2, Paragraph B, the second line to delete the figure 200 feet and change to read "150 feet".

Page 2, delete the fourth Paragraph starting with the words "A permit issued in..." in its entirety, replacing it with Paragraph C on page 3 replacing the title words Annual House Trailer or Mobile Home with

“Motor Vehicle or Machinery Junk Yards” where placed and changing the amount of fee on line 7 to read “25.00”, or act in relation thereto.

A motion was made by Selectman Todd and seconded by Jay Marden in favor of these changes. Selectman Todd explained that a meeting took place involving Town Counsel David L. Nixon, Judge Pingree and the Board of Selectmen, to discuss the wording of the above-mentioned Ordinance, and that the proposed amendments would give the Selectmen a stronger position by which to enforce the Ordinance. Concern was expressed as to how many unregistered vehicles would be allowed on a person’s property, whether or not the ordinary citizen would be able to keep unregistered vehicles for purposes of hauling wood or parts, and who would make the determination as to whether a person were in violation of the Ordinance. John Palmer moved the question, seconded by Jay Marden, the motion passed. When the Article to amend the present Ordinance was put to a vote, it was defeated.

Article 17. To see if the town will give the selectmen authority to issue Gravel Permits under the Provisions of RSA 155-E, or act in relation thereto.

A motion was made by Selectman Sallada and seconded by Selectman Todd to adopt the Article. Selectman Sallada explained that RSA 155-E was a new State Law giving the authority to issue gravel permits to the Planning Board, and to have the authority returned to the Selectmen would take a vote of Town Meeting. The Planning Board was in favor of the return of authority to the Selectmen, as was expressed by Planning Board member Samuel Brooks. Selectman Sallada stated that the passage of this Article would in no way affect our present Gravel Ordinance. The question was moved by Linda Rollins, seconded by Wayne Daniels, and so voted. A vote on the Article as printed was taken and was favorable.

Article 18. To see if the town will vote to amend the Gravel Ordinance as passed March 6, 1973 as follows: in the introduction beginning on line 4, strike out “and except where such removal is for the purposes of construction of non-commercial residential buildings”, or act in relation thereto.

Selectman Mansfield so moved the article and was seconded by Selectman Sallada. Selectman Mansfield explained that the amendment would eliminate a now-existing loophole in the Ordinance and would force all operators to report all gravel removed, which is not the case in the present Ordinance. The Article was so adopted.

Article 19. To see if the town will vote to authorize the Conservation Commission to retain the unexpended portion of its funds, said funds to be placed in a Special Conservation Fund in accordance with RSA 36-A5, or act in relation thereto.

The motion to so authorize was made by Patricia Getman and seconded by David Woodbury. Patricia Getman, a member of the Conservation Commission, explained that as it now stands Commission money should be put into the general funds of the Town and any bills incurred by the Commission presented to the Selectmen for payment. Passage of this Article would enable the Commission to keep a recent donation received to be used for scheduled projects of the Commission. The Article passed.

Article 20. To see if the town will vote to authorize the Selectmen to sell

at public auction or administer property of the town acquired by tax deed or gift, or sell to the former owner upon payment to the town of an amount not less than the sum total of the over-due taxes plus interest on the aggregate of the foregoing, calculated at the rate of 11% per annum, or act in relation thereto.

Selectman Sallada so moved the Article, seconded by Selectman Todd. Selectman Sallada explained that this was different from previous years' Articles relating to this subject in that the Selectmen would like the authority to sell property acquired by tax deed to the former owner, at no loss of revenue to the Town and undue embarrassment to the taxpayer involved. The Article passed.

Article 21. To see if the town will require that the Selectmen, before disposing of real property the title to which has been acquired by Tax Collector's deed first consult with the Conservation Commission, or act in relation thereto.

Selectman Sallada moved to see if the town will require that the Selectmen, before disposing of real property the title to which has been acquired by Tax Collector's deed first consult with the Conservation Commission except those parcels which have a dwelling thereon. This motion was seconded by Selectman Mansfield and so voted by the assembled group.

Article 22. To see if the town will authorize the Selectmen to apply for, and receive and expend federal or state grants, which may become available during the course of the year, and also to accept and expend money from any other governmental unit or private source to be used for purposes for which the town may legally appropriate money; provided; (1) that such grants and other monies do not require the expenditure of other town funds, (2) that a public hearing shall be held by the Selectmen prior to the receipt and expenditure of such grants and monies; and (3) that such items shall be exempt from all provisions of RSA 32 relative to limitation and expenditure of town monies, all as provided by RSA 31:95B, or act in relation thereto.

Selectman Sallada moved the Article, seconded by Selectman Mansfield, and it was adopted.

Article 23. To see if the town will vote to authorize the Selectmen to hire money to meet the necessary expenses of the town, or act in relation thereto.

A motion to adopt the Article was made by Selectman Sallada, seconded by Howard Towne, and voted affirmatively by those assembled.

Article 24. To transact any other business that may legally come before the meeting.

A motion was made by Richad Warnock to see if the Town will vote to require that any Town Ordinance requiring posted or published amendment changes be printed in entire context. This was seconded by David Elliott and the motion then adopted.

The meeting was then adjourned at 12:50 a.m. The ballots were then counted and the Moderator swore in the newly elected Selectman LeRoy Lowell.

Respectfully submitted,

SANDRA GENDRON, Town Clerk

TOWN WARRANT 1981

The State of New Hampshire

To the inhabitants of the Town of New Boston, in the County of Hillsborough, qualified to vote in town affairs:

You are hereby notified to meet at the Town Hall in said New Boston on Tuesday the tenth day of March next. Polls will be open at 10 o'clock in the forenoon to take up Articles 1 and 2. Balance of the Warrant will be taken up and voted upon at 7:00 o'clock in the afternoon. Polls will close at 7:00 p.m.

1. To choose all necessary officers for the ensuing year.

2. Are you in favor of the amendments to the New Boston Zoning Ordinance relative to the National Flood Insurance Program as proposed by the Planning Board, as follows:

Amend ARTICLE III, Section 3-1 to read as follows:

Upon the passage of this Ordinance, land shall be used and buildings shall be used, constructed or enlarged only in conformity with the following regulations (normal maintenance and repairs of a building, unless otherwise specified herein, shall not require a permit).

Amend ARTICLE III, Section 3-2 to read as follows:

The Town of New Boston shall be one (1) district of farms, residences and woodlands. Within this district there is also established as an overlay, a Floodplain District. The underlying permitted uses are allowed provided they meet the additional requirements of Section 3-3. The following regulations shall apply:

Amend ARTICLE III, by adding a new Section 3-3 to read as follows:

Section 3-3 Floodplain District

The Floodplain District includes all special flood hazard areas designated as Zone A and A1 through A30 on the New Boston Flood Insurance Rate Maps (FIRM) and the Flood Boundary and Floodway Maps dated May 19, 1981 on file with the Town Clerk, Planning Board and Board of Selectmen. These maps, as well as the accompanying New Boston Flood Insurance Study, are incorporated herein by reference.

A. Floodplain Development Regulations. The following regulations shall apply to all special flood hazard areas:

1. Regulatory Floodway - Within the Regulatory Floodway, designated on the Flood Boundary and Floodway Maps, the following provisions shall apply:

(a) Encroachments, including fill, new construction, substantial improvements to existing structures, and other development are prohibited unless certification by a registered professional engineer is provided by the applicant demonstrating that such encroachment shall not result in any increase in flood levels during the occurrence of the 100-year flood.

For the purposes of this part, "development" is defined to mean any man-made change to improved or unimproved real estate, including but not limited to buildings or other structures, mining, dredging, filling, grading, paving, excavation or drilling operations.

"Substantial improvement" is defined to mean any repair, reconstruction, or improvement of a structure, the cost of which equals or exceeds 50 percent of the market value of the structure either (a) before the improvement or repair is started, or (b) if the structure has been damaged, and is being restored, before damage occurred.

The term "substantial improvement" does not include either of the following:

(i) any project for improvement of a structure in order to comply with existing State or local health, sanitary, or other code specifications which are solely necessary to assure safe living conditions, or

(ii) any alteration of a structure listed on the National Register of Historic Places or a State Inventory of Historic Places.

(b) The placement of mobile homes is prohibited except in existing mobile home parks.

2. All proposed development in any special flood hazard area shall require a permit. The term "development" is defined to mean "any man-made change to improved or unimproved real estate, including but not limited to buildings or other structures, mining, dredging, filling, grading, paving, excavation or drilling operations".

3. Where new and replacement water and sewer systems (including on-site systems) are proposed, the applicant shall provide the Board of Selectmen with assurance that the systems are located, designed and will be constructed to minimize infiltration and avoid impairment by flood waters.

4. The Board of Selectmen shall review all building permit applications for new construction or substantial improvements (meaning any repair, reconstruction, or improvement of a structure, the cost of which equals or exceeds 50 percent of the market value of the structure either (a) before the improvement or repair is started, or (b) if the structure has been damaged, and is being restored, before the damage occurred) to determine whether proposed building sites will be reasonably safe from flooding. If a proposed building site is in a location that has a flood hazard, any proposed new construction or substantial improvement (including prefabricated and mobile homes) must:

(a) be designed (or modified) and anchored to prevent flotation, collapse, or lateral movement of the structure;

(b) use construction materials and utility equipment that are resistant to flood damage; and

(c) use construction methods and practices that will minimize flood damage.

The Board of Selectmen shall maintain for public inspection and furnish upon request, for the determination of applicable flood insurance risk premium rates within all areas having flood hazards identified on a Flood Insurance Rate Map, any certification of flood-proofing, and information on the elevation (in relation to mean sea level) of the level of the lowest floor (including basement) of all new or substantially improved structures, and include whether or not such structures contain a base-

ment, and if the structure has been floodproofed, the elevation (in relation to mean sea level) to which the structure was floodproofed. This information must be furnished by the applicant.

5. The Board of Selectmen shall review proposed developments to assure that all necessary permits have been applied for and/or received from those governmental agencies from which approval is required by Federal or State law, including Section 404 of the Federal Water Pollution Control Act Amendments of 1972, 33 U.S.C. 1334. It shall be the responsibility of the applicant to certify these assurances to the Board of Selectmen.

6. In riverine situations, prior to the alteration or relocation of a watercourse, the applicant for such authorization shall notify the N.H. Office of State Planning and submit copies of such notification to the Board of Selectmen and the Federal Insurance Administration. Further, the applicant shall be required to submit copies of said notification to those adjacent communities, as determined by the Board of Selectmen.

Within the altered or relocated portion of any watercourse, the applicant shall submit to the Board of Selectmen certification provided by a registered professional engineer assuring that the flood carrying capacity of the watercourse has been maintained.

The following requirements shall apply in specific zones designated on the Flood Insurance Rate Maps:

7. In unnumbered "A" zones, the Board of Selectmen shall obtain review, and reasonably utilize any base flood elevation data available from a Federal, State, or other source, until such other data has been provided by the Administrator, as criteria for requiring that (i) all new construction and substantial improvements of residential structures have the lowest floor (including basement) elevated to or above the base flood level, and (ii) that all new construction and substantial improvements of non-residential structures have the lowest floor (including basement) elevated or floodproofed to or above the base flood level.

8. In zones "A1 through A30", for new construction and substantial improvements, the Board of Selectmen shall require that:

a) Residential structures have the lowest floor (including basement) elevated to or above the base flood level.

b) Non-Residential structures have the lowest floor (including basement) elevated to or above the base flood level; or together with attendant utility and sanitary facilities, to be designed so that below the base flood level the structure is watertight with walls substantially impermeable to the passage of water and with structural components having the capability of resisting hydrostatic and hydrodynamic loads and effects of buoyancy.

9. In zones "A1 through 30", where floodproofing is used in lieu of elevation, a registered professional engineer or registered architect shall certify to the Board of Selectmen that the floodproofing methods used are adequate to withstand the flood depths, pressures, velocities, impact and uplift forces and other factors associated with the base flood.

10. In Zones A1 through A30” for mobile home placement, the Board of Selectmen shall require that:

a) Stands or lots are elevated on compacted fill or on pilings so that the lowest floor of the mobile home will be at or above the base flood level:

b) Adequate surface drainage and access for a hauler are provided; and,

c) In the instance of elevation on pilings:

(1) lots are large enough to permit steps;

(2) piling foundations are placed in stable soil and are no more than ten feet apart; and,

(3) reinforcement is provided for pilings that extend more than six feet above the ground level.

11. In unnumbered “A” zones and in zones “A1 through A30”, mobile homes shall be anchored to resist floatation, collapse, or lateral movement by providing over-the-top and frame ties to ground anchors. Specific requirements shall be that (i) over-the-top ties be provided at each of the four corners with two additional ties per side at intermediate locations and mobile homes less than 50 feet long shall require one additional tie per side; (ii) frame ties be provided at each corner with five additional ties per side at intermediate points and mobile homes less than 50 feet long shall require four additional ties per side; (iii) all components of the anchoring system shall be capable of carrying a force of 4,800 pounds; and (iv) any additions to the mobile home shall be similarly anchored.

Amend ARTICLE V, Section 5-2, part A.3. paragraph 2 to read as follows:

Normal maintenance and repairs of a building, unless located within the Floodplain District, will not require a permit provided it does not exceed the floor space occupied by the present building.

Amend ARTICLE V, Section 5-3 by adding a new part C to read as follows:

C. Floodplain District: Should the Board of Adjustment consider an appeal for a variance from the requirements set forth for the Floodplain District in this Ordinance, the following procedures will be adhered to:

1. The Board of Adjustment shall only issue a variance upon:

a. a showing of good and sufficient cause, and

b. a determination that failure to grant the variance would result in exceptional hardship to the applicant, and

c. a determination that the granting of a variance will not result in increased flood heights, additional threats to the public safety, extraordinary public expense, create nuisances, cause fraud on or victimization of the public, or conflict with local laws, and

d. a determination that the variance is the minimum necessary, considering the flood hazard, to afford relief.

2. Variances may be issued for structures to be erected on a lot of one half acre or less in size, if otherwise permitted by law, contiguous to and surrounded by lots with existing structures constructed below the base flood level.

3. A variance shall not be issued within any regulatory floodway if any increase in flood levels during the base flood discharge would result.

4. If a variance is granted, the Board of Adjustment shall notify the applicant in writing over their signature that:

a. the issuance of such a variance to construct a structure below the base flood elevation will result in increased premium rates for flood insurance up to amounts as high as \$25 for \$100 of insurance coverage, and

b. such construction below the base flood level increases risks to life and property.

5. The Board of Adjustment will maintain a record of all actions, including justification for their issuance and report such variances issued through the Annual Report submitted to the Federal Emergency Management Agency.

6. Variances may be issued for the reconstruction rehabilitation, or restoration of structures listed in the National Register of Historic Places or on the State Inventory of Historic Places, without regard to the procedures set forth above.

These amendments are those needed to meet the minimum requirements of the National Flood Insurance Program. The Town of New Boston will have to adopt these amendments in March, 1981 in order to continue its eligibility to participate in the Program when the Town's Flood Insurance Study and associated maps become effective on May 19, 1981.

3. To raise such sums of money as may be necessary to defray town charges for the ensuing year and make appropriations of the same.

1. For Town Officers Salaries
2. For Town Officers Expenses
3. For Legal Fees
4. For Election and Registration
5. For Town Hall and Town Offices
6. For Police Department
7. For Fire Department
8. For Costs of Fires
9. For Forest Fires
10. For Planning Board
11. For SNHPC
12. For Board of Adjustment
13. For Work on Tax Base Map
14. For Civil Defense
15. For Monadnock Visiting Nurse
16. For Vital Statistics
17. For Town Dump
18. For Summer Maintenance, Highway
19. For Additional Highway Subsidy

20. For Winter Maintenance, Highway
21. For Resurface Tarred Roads
22. For General Expense, Highway
23. For Street Lighting
24. For Library
25. For Old Age Assistance
26. For Memorial Day
27. For Care of Town Grounds
28. For Forestry Committee
29. For Recreation Commission
30. For Support of Cemetery
31. For Social Security
32. For Unemployment Compensation
33. For Principal on Long Term Note
34. For Payment of Interest
35. For Payment of Insurance

4. To see if the town will vote to raise and appropriate the sum of \$1,775.37, the State to contribute \$11,835.78, for Town Road Aid, or act in relation thereto.

5. To see if the town will vote to raise and appropriate the sum of \$90,225.32 and to withdraw and appropriate the Library Capital Reserve Fund of \$7,777 plus interest and the \$19,274.68 from Revenue Sharing Funds, making a total of \$117,277.00 for the proposed addition to the Whipple Free Library, or act in relation thereto.

6. To see if the town will authorize the Selectmen to issue long term notes to cover any appropriations made under Article No. 5, or act in relation thereto.

7. To see if the town will vote to accept any forthcoming gifts to the Building Fund for the Whipple Free Library's addition in the coming years to be applied toward the payment of principal and interest on any serial notes or bonds, or act in relation thereto.

8. To see if the town will vote to adopt the Fire Protection Code for Large Buildings as proposed by the New Boston Fire Wards, as follows:

Fire Protection Code for Large Buildings

New Boston, NH

SECTION ONE

Classification of Buildings

A) Buildings in the Town shall be classified in the following manner:

1) Class I: Class I buildings are defined as buildings that are not Class II or Class III. Class I buildings are not subject to this Code.

2) Class II: A building is considered a Class II building if it meets any of the following conditions but does not meet any of the conditions under Class III.

a) Any newly constructed or substantially renovated building containing three or more living units.

b) Any newly constructed or substantially renovated building containing sleeping accommodations for 15 or more persons not members of the same family.

c) Any newly constructed or substantially renovated building licensed by the State of New Hampshire and used as a home for the elderly, the partially or totally incapacitated, or a health care facility, where there are sleeping accommodations for more than three persons.

d) Any newly constructed or substantially renovated building of 5,000 or more square feet gross floor area.

e) Any building which is part of a Planned Building Group as defined by Section Four of this Code, unless such building is classified as Class III.

f) Any newly constructed or substantially renovated building, structure, or any occupancy or land use which because of its nature constitutes a high occupancy hazard as defined by Section Two of this Code, or the Fire Wards deem an unacceptable life hazard, or by its nature would constitute a severe health hazard to the citizens of the Town in the event of an emergency to which the Fire Department would respond.

3) Class III: A building is considered a Class III building if it meets any of the following conditions.

a) Any newly constructed or substantially renovated building containing 12 or more living units.

b) Any newly constructed or substantially renovated building in which there are sleeping accommodations for more than 40 persons not members of the same family or where sleeping accommodations are provided below grade or more than one story above the first floor.

c) Any newly constructed or substantially renovated building licensed by the State of New Hampshire and used as a home for the elderly, the partially or totally incapacitated, or a health care facility, where there are sleeping accommodations for more than six persons, or where there are sleeping accommodations above the first floor or below grade level.

d) Any newly constructed or substantially renovated building of more than 5,000 but less than 20,000 square feet gross floor area, and not divided by one or more fire resistive partitions and floor-ceiling assemblies into areas not exceeding 5,000 square feet gross floor area per story. Such fire restrictive partitions shall have a minimum rating of four hours and floor-ceiling assemblies shall have a minimum rating of one hour and shall be designed and constructed in accordance with Section Three, Part N of this Code.

e) Any newly constructed or substantially renovated building of more than 20,000 square feet gross floor area.

f) Any newly constructed or substantially renovated building of more than 35 feet in height.

g) Any place of assembly with a rated capacity of more than 200 persons, or any place of assembly located below grade level or more than one story above the first floor.

B) Definitions

1) General

Terms used in this Code shall be consistent with the definitions used in the National Fire Protection Association (herein referred to as NFPA) Standard 101 "Code for Safety to Life From Fire in Buildings and Structures (1976)."

2) Specific definitions:

a) **First Floor:** The first floor of a building is the lowest story of which one-half or more is above the grade level. However, if the level below grade is used for purposes other than storage and building services, then it shall be considered the first floor of the building.

b) **Grade or Grade Level:** The grade or grade level of a building shall be the average height of the ground on those sides of the building with means of access for fire department apparatus.

c) **Gross Floor Area:** Gross floor area shall be the floor area within the inside perimeter of the outside walls of the building under consideration with no deduction for hallways, stairs, closets, thickness of interior walls, columns, or other features.

d) **Height:** As applied to a building, height means the vertical distance from grade to the average elevation of the roof of the highest story.

e) **Listed:** Listed shall mean equipment or materials included in a list published by a nationally recognized testing laboratory that maintains periodic inspection of production of listed equipment or materials, and whose listing states either that the equipment or materials meets nationally recognized standards or has been tested and found suitable for use in a specified manner.

f) **Place of Assembly:** A place of assembly shall include but not be limited to all buildings or portions of buildings used for gathering together of 35 or more persons (as determined by Section Four) and used for such purposes as deliberation, worship, entertainment, amusement, or awaiting transportation.

g) **Story:** A story is that portion of a building included between the upper surface of a floor and the upper surface of the floor or roof next above. A mezzanine shall be considered a story if it exceeds $33\frac{1}{3}$ percent of the area of the floor immediately below. A penthouse shall be considered a story if it exceeds 10,000 square feet or $33\frac{1}{3}$ percent of the roof area.

h) Types of Construction:

--**Fire Resistive:** A building constructed of non-combustible materials (reinforced concrete, brick, or stone and having any metal properly fire-proofed) with major structural members designed to withstand collapse and to prevent the spread of fire.

--**Non-combustible:** A building having all structural members (including walls, floors, and roofs) of non-combustible material and not qualifying as fire-resistive construction.

--**Ordinary Construction:** A building having exterior walls of masonry

or other non-combustible material in which the other structural members are wholly or partly of wood or other combustible material.

--Wood Frame: A building in which the structural members are wholly or partly of wood or other combustible material and the construction does not qualify as ordinary construction.

SECTION TWO

Water Supply

A) Unless specifically exempted by other provisions of this Code, any Class II or Class III building shall provide, as a minimum of fire protection, a quantity of water determined by and installed according to National Fire Protection Association (herein referred to as NFPA) Standard 1231 "Water Supplies for Suburban and Rural Fire Fighting (1975)," and subject to the following provisions:

1) A minimum quantity of water for any occupancy shall be 5,000 gallons.

2) The water storage system must be capable of flowing water at a rate of 1,000 gallons per minute at draft for at least three-quarters of the required water supply.

3) The calculated quantity of water shall be modified as follows depending upon the type of construction of the building.

--Fire Resistive Construction: the required quantity of water shall be 50% of the calculated quantity.

--Non-Combustible Construction: the required quantity of water shall be 75% of the calculated quantity.

--Ordinary Construction: the required quantity of water shall be 100% of the calculated quantity.

--Wood Frame Construction: the required quantity of water shall be 150% of the calculated quantity.

4) The fire department pumper suction connection must not be closer than 70 feet from the nearest part of a building nor more than 600 feet truck travel distance from any building which it is to serve or the fire department connection of the building if required to have a standpipe system or automatic sprinkler system.

The maximum distance may be waived by the Fire Wards if, and only if, there are important advantages to a different water supply, but in no case shall the maximum truck travel distance be greater than 1,000 feet.

5) The fire department pumper must be able to connect to the suction piping with one ten-foot length of suction hose at any time of year.

6) The fire department suction connection shall not be situated so that, when in use, a street, road, driveway, fire lane, or any other access way to a building is blocked to vehicle travel.

7) Any natural source of water shall be certified in writing by the U.S. Soil Conservation Service or a registered engineer as having a 95 percent safe yield for the required quantity.

8) The responsibility for maintenance of the water supply system and the grounds around such is solely that of the property owner.

9) Any water supply system required by this Code must be capable of complete inspection and/or testing every year. At such time the Fire Wards may require alterations or repairs to correct any deficiencies.

10) Any water supply system required by this Code shall be available for Fire Department use, at its discretion, in the event of an emergency. If used for an emergency on another property, the Fire Department shall be responsible for promptly refilling said water supply.

SECTION THREE

Construction Requirements

Any Class II or Class III building shall be constructed and equipped to satisfy the following requirements.

A) Chimneys, Fireplaces, and Vents

1) All chimneys of Class II or Class III residential buildings shall be lined, masonry chimneys constructed according to NFPA Standard 211 "Chimneys, Fireplaces, and Vents (1977)."

2) All chimneys of Class II or Class III non-residential buildings shall be constructed according to NFPA Standard "Chimneys, Fireplaces, and Vents (1977)." Additionally, if a chimney is connected to a solid fuel device it shall be a lined, masonry chimney.

B) Roof Coverings

Any Class II or Class III building shall have roof coverings of a material having not less than an Underwriters Laboratories Class C rating.

C) Stairways

NOTE: All fire resistive partitions and floor-ceiling assemblies shall be designed and constructed in accordance with Section Three, Part N.

1) Any Class II or Class III non-residential building of three or fewer stories in height, or any Class II or Class III residential building of four or more units having a stairway serving more than one unit, shall have all such stairways completely enclosed by a fire resistive partition having a one hour rating.

a) All doors opening into this stairway from other than a living unit shall be listed one hour fire doors with hold-open, automatic release door controls activated by the local alarm system.

b) All doors opening into this stairway from a living unit shall be listed one hour doors equipped with listed self-closers.

2) Any Class II or Class III building more than three stories in height or 35 feet in height shall have all stairways enclosed by a fire resistive partition having a two hour rating.

a) All doors leading into such stairways shall be listed one and one-half hour fire doors equipped with hold-open, automatic release door controls.

b) Each stairway shall have a listed, automatic opening smoke vent device of sufficient size at the top of the stairway.

c) The automatic release door closures and the smoke vents shall be activated by the local alarm system.

D) Smoke and Heat Venting

1) Any Class II or Class III non-residential building shall have automatic smoke and heat venting systems designed and installed in accordance with NFPA Standard 204 "Smoke and Heat Venting (1968)," and said vents shall be activated by heat and manually from a location at the annunciator panel.

2) If the eaves of any Class II or Class III building are more than 30 feet above grade level or the chord of the rafters is longer than 16 feet, the building shall be equipped with smoke and heat vents installed in accordance with NFPA Standard 204 "Smoke and Heat Venting (1968)," and subject to the approval of the Fire Wards.

a) If any such building with smoke or heat vents has a chimney that could be connected to a solid fuel device, the smoke or heat vent nearest

the chimney shall be manually operable and shall provide access to the roof without the use of any portable equipment. Such access shall be from a common area of the building.

b) Vents shall be activated by heat and manually from a location at the annunciator panel.

E) Access to Attic or Cockloft

Any Class II or Class III building shall provide access to any attic, or cockloft area, and the clear dimensions of the opening shall be a minimum of 18 by 36 inches. Such access shall be in a common area of the building.

F) Access to Roof

If any Class II or Class III building has a flat or substantially flat roof, access shall be provided to the roof by bulkhead or hatch. The clear opening shall be a minimum of 18 by 36 inches. Access shall be provided so that it is not necessary to use portable equipment to attain the roof. Such access shall be in a common area of the building.

G. Heat or Smoke Detection Systems

Class II and Class III buildings shall have automatic heat or smoke detection systems designed, installed, and maintained according to:

--NFPA Standard 72A "Local Protective Signaling Systems (1979);"

--NFPA Standard 72B "Auxiliary Protective Signaling Systems (1979);"

--NFPA Standard 72C "Remote Station Protective Signaling Systems (1979);"

--NFPA Standard 72D "Proprietary Protective Signaling Systems (1979);"

NFPA Standard 72E "Automatic Fire Detectors (1978);"

NFPA Standard 74 "Household Fire Warning Equipment (1978)."

1) All local alarm systems shall have automatic means of notifying the Fire Department in a manner approved by the Fire Wards. At such time as the Fire Wards adopt an approved auxiliary protective signaling system, upgrading of the existing fire department notification system of Class III buildings to conform will be required within three years of the notification of the property owner.

2) All local alarm systems shall have control panels that permit the switching-out of any one zone while permitting the continuous performance of all other zones.

3) All local alarm systems shall have annunciator panels on the outside of the building or in a common unlocked entry hall at, or in close proximity to, the normal route of entry into the building.

4) Marking of Control and Annunciator Panels

a) All identifications on control and annunciator panels shall clearly designate the condition or area affected rather than simply indicating the zone affected.

b) All indicator lights shall be as follows:

Green lights shall indicate a normal condition;

Orange or yellow lights shall indicate a trouble condition;

Red lights shall indicate an alarm condition.

5) Outside Alarm Indicators

a) Each building in a Planned Building Group shall have an outside alarm indicating light which is easily visible from the normal vehicle approach route to the building.

b) All Class II or Class III non-residential buildings shall have an outside audible alarm device approved by the Fire Wards.

6) Class II or Class III residential buildings shall have an approved single station smoke detector, powered by the house electrical service, installed in an approved manner in every living unit.

7) Class II or Class III residential buildings of ten or more units shall have, in addition to the other requirements, a local alarm system installed as follows:

- all common areas shall be protected by smoke detectors;
- hallways shall have manual pull stations;
- each entry foyer shall have a manual pull station;
- each living unit shall have at least one heat detector.

8) If an alarm system installation results in an excessive number of unnecessary alarms, the Fire Wards can require that it be disconnected and a Notice of Hazard can be issued according to Section Eight.

H) Protection of Multi-Unit Residential Buildings

NOTE: All fire resistive partitions and floor-ceiling assemblies shall be designed and constructed in accordance with Section 3, Part N.

1) Residential buildings of three or more living units, or side-by-side construction, with no occupancy superimposed over another, and with a separate entrance to each unit, shall have an unpenetrated, one hour fire resistive partition between any two living units.

In addition, this fire resistive partition shall be upgraded to a two hour rating so that there are a maximum of four living units between those two hour partitions.

2) Residential buildings of three or more living units, with two or more units superimposed over another, or with common entrance hallways, shall have a one hour fire resistive partition and floor-ceiling assembly between any two living units.

In addition this partition and floor-ceiling assembly shall be upgraded to a two hour fire resistive partition so that no more than six living units are contained therein.

Furthermore it is required that a four hour fire resistive masonry partition shall be constructed so that no more than twelve units are contained therein.

These requirements shall also apply to any wall or floor-ceiling assemblies shared with common attic, cellar, or crawl spaces.

I) Multi-Occupancy Buildings

NOTE: All fire resistive partitions and floor-ceiling assemblies shall be designed and constructed in accordance with Section 3, Part N.

When a building contains more than one occupancy, and each occupancy is separately classified as to use, each occupancy shall be completely separated by a four-hour fire resistive masonry partition.

J) Portable Fire Extinguishers

Class II and Class III buildings shall have portable fire extinguishers installed and maintained according to NFPA Standard 10 "Portable Fire Extinguishers (1978)," and shall meet the following requirement:

In residential buildings, a portable fire extinguisher having a minimum rating of 2A, 10BC shall be provided for, and installed in, every living unit.

K) Any Class II or Class III residential building with six or more living units and where stairways and entrances serve more than one living

unit shall have emergency lighting in accordance with NFPA Standard 101 "Code for Safety to Life From Fire In Buildings and Structures (1976)."

L) If deemed necessary by the Fire Wards, keys to gain access to normally locked areas of a building shall be provided in a listed exterior lock box approved by the Fire Wards.

M) All structures more than three stories in height or over 50 feet in height above grade and containing intermediate stories or balconies shall be equipped with a Class I dry standpipe system installed and maintained in accordance with NFPA Standard 14 "Installation of Standpipes and Hose Systems (1978)."

N) Fire Resistive Partitions

All fire resistive partitions or floor-ceiling assemblies shall be designed and constructed in accordance with Underwriters Laboratories specifications.

The purpose of any fire resistive division is to contain heat and smoke to one side for the required length of time.

Specifically, as a minimum any fire resistive partition shall extend from the floor of the lowest level of the building to the inside surface of the roof sheathing, and from the inside of the sheathing of one to the inside sheathing of another outermost wall.

Specifically, as a minimum any fire resistive floor-ceiling assembly shall extend from the inside of the sheathing of an outside wall or fire resistive partition to the inside of the sheathing of another outside wall or fire resistive partition.

Any openings in fire resistive partitions or floor-ceiling assemblies that are permitted, and any joints between these and roof or wall sheathing shall be sealed with materials of equal or greater fire resistance.

O) All doors opening into any common area shall be listed one-hour fire doors equipped with listed self-closers.

P) Means of Access for Fire Department Apparatus

1) General Requirements

a) Means of access for fire department apparatus shall consist of driveways, fire lanes, private streets, parking lot lanes, or a combination thereof.

b) Means of access for fire department apparatus shall be provided to all Class II or Class III buildings in accordance with the applicable sections of this Code and other local zoning or subdivision requirements.

c) For any building meeting the conditions of Section One, Part 2a, 2e, 2b, 2c, 3a, 3b, 3c, or 3g, means of access shall be constructed of a hard surface adequately designed to support the heaviest piece of fire apparatus likely to be operated on the fire lane, private street, street, or parking lot lane.

For any building meeting the conditions of Section One, Part 2d, 3d, 3e, or 3f, means of access shall be constructed of a hard surface or crushed bank-run gravel adequately designed to support the heaviest piece of fire apparatus likely to be operated on the fire lane, private street, street, or parking lot lane.

d) Every dead-end means of access more than 300 feet in length shall be provided with a turn-around at the closed end at least 60 feet radius of usable road.

e) Turns in means of access shall maintain the minimum width and

shall be constructed with minimum radius of 25 feet at the inside curb line and radius of 50 feet at the outside curb line.

f) Means of access shall not be less than 20 feet wide provided no parking is allowed, not less than 28 feet wide if parallel parking is allowed on one side, and not less than 36 feet wide if parallel parking is allowed on both sides.

g) Parking in any means of access shall not be permitted within 10 feet of a fire department water source or in any other manner which will obstruct or interfere with the fire department's use of the water sources.

h) "No Parking" signs or other designations indicating that parking is prohibited will be constructed at all normal and emergency access points to structures and within 10 feet of each fire department water source.

2) Fire Lanes

a) Fire lanes shall be at least 20 feet in width with the road edge closest to the structure at least 10 feet from the structure. A fire lane in a green belt need only be 12 feet wide if there are no turns.

b) Fire lanes connecting to public streets, roadways, or private streets shall be provided with curb cuts extending at least two feet beyond each edge of the fire lane.

c) Chains or other barriers may be provided at the entrance to fire lanes or private streets, provided they are installed with breakaway locks.

d) Responsibility for the maintenance of any private road, street, fire lane, or parking lot is solely that of the property owner. Maintenance shall be such that they can be used in an emergency at any time of the year.

e) Parking lot lanes shall have a minimum of 25 feet clear width between rows of parked vehicles for vehicular access and movement.

f) Curbs across fire lanes shall be sloping.

Q) Location of Structures

1) For residential buildings, at least three perimeter walls of structures, all exterior doors into structures, and all fire department connections to standpipe or sprinkler systems shall be within 125 feet of an approved fire lane or street.

For non-residential buildings, at least two perimeter walls of structures, all exterior doors into structures, and all fire department connections to standpipe or sprinkler systems shall be within 125 feet of an approved fire lane or street.

2) Structures exceeding 30 feet in height shall not be set back more than 50 feet from a street, fire lane, or private street on any of its three sides.

3) At least 14 feet of nominal clearance shall be provided over streets, private streets, fire lanes, and other required means of vehicular access.

4) Landscaping or other obstructions shall not be placed around structures in a manner so as to impair or impede accessibility for firefighting and rescue operations.

5) The location of structures and access to each structure shall be approved by the Fire Wards before Permit(s) for Construction can be issued.

6) The location of all fire department connections and their method of

marking shall be approved by the Fire Wards before Permit(s) for Construction can be issued.

7) The final assigning of legal addresses to buildings shall be done by the Fire Wards, and will be done during the final construction phase.

SECTION FOUR

Life Safety

All Class II and Class III buildings shall conform to NFPA Standard 101 "Code for Safety to Life From Fire in Buildings and Structures (1976)," in addition to conforming to the other provisions of this Fire Protection Code.

SECTION FIVE

Planned Building Groups

A) Definition:

A **Planned Building Group** is a number of structures constructed on a parcel of land which is under the ownership, control, or development of one individual, corporation, partnership, or firm, excluding farms. Other features which distinguish Planned Building Groups include, but are not limited to: limited means of vehicular access to the property; construction of structures having similar occupancies and/or design appearance; and possibly written property restrictions relative to the maintenance, use, and operation of the structures constructed thereon.

B) In addition to satisfying the other applicable requirements of this Code, Class II and Class III buildings that are part of a Planned Building Group shall be separated from other structures by at least 80 feet of clear space between structures, and 40 feet from a common property line.

SECTION SIX

Fire Protection Requirements for Class III Buildings

A) Any building that is defined as a Class III building in Section One of this Code, in addition to satisfying the other requirements of this Code, shall be fully protected by automatic sprinkler systems installed and maintained in accordance with NFPA Standard 13 "Installation of Sprinkler System (1978)" and NFPA Standard 13A "Care and Maintenance of Sprinkler Systems (1978)," and subject to the following provisions.

1) For any building meeting the conditions of Section One, Part 3a, 3b, 3c, or 3g, the water supply for the sprinkler system shall be sized in accordance with NFPA Standard 13 "Installation of Sprinkler Systems (1978)."

Additionally, there shall be a static water supply designed and installed in accordance with Section Two of this Code.

2) For any building meeting the conditions of Section One, Part 3d, 3e, or 3f, the required water supplies shall be in accordance with the following schedule:

i) If the sprinkler system water supply is sized to meet the minimum requirements of NFPA Standard 13 "Installation of Sprinkler Systems (1978)," there is no requirement for a static water supply.

ii) If the sprinkler system water supply is designed according to the minimum requirements of NFPA Standard 13 "Installation of Sprinkler Systems (1978)" and sized for a duration of 30 minutes, there shall be provided a static water supply designed and installed according to Section Two of this Code.

3) Several buildings of a planned building group may utilize the same water supply for sprinkler protection as long as the water supply is designed for the largest hazard of the group. Each building shall have a fire department connection serving only that building.

4) The flow of water equal to the discharge of one sprinkler head shall activate the local alarm system of the building, which shall automatically notify the occupants of the building and the fire department. The alarm system shall have a separate zone allocated for the sprinkler system.

5) Any building with multiple sprinkler systems shall have a separate zone of its local alarm system allocated for each sprinkler system.

6) Any particular hazard which cannot be adequately protected by automatic sprinklers shall be fully protected by automatic extinguishing equipment designed and installed in accordance with an applicable nationally recognized standard and approved by the Fire Wards.

SECTION SEVEN

Hazardous Materials Placarding

Any Class II or Class III building, or an associated building, storing a hazardous material shall placard such storage in accordance with NFPA Standard 704 "Identification of the Fire Hazards of Materials (1975)," and in the following manner.

A) Manner of Placarding

1) All main entrances to buildings storing hazardous materials shall be placarded with signals legible at 300 feet.

2) All other entrances to buildings storing hazardous materials shall be placarded with signals legible at 200 feet.

3) All areas inside a building used for storage of a hazardous material shall be placarded with signals legible at 100 feet. Although the interior distances of a building may not reach this magnitude, it is considered necessary that the signals be of such size to be easily visible at a distance.

SECTION EIGHT

Administration Provisions

A) This Code is intended to insure minimum levels of fire safety protection to life and property. The provisions of this Code should not be considered maximum limits of desirable or necessary fire protection. Nor is this Code intended to guarantee sufficient fire safety protection for any building or occupancy, nor does it take precedence over any other code or requirement, whether state, local, or federal, which may be more stringent.

B) Plans Review and Approval

1) All plans for buildings or occupancies subject to this Code shall be submitted to, and approved by, the Fire Wards before a Permit for Construction can be issued. The period for plans review shall be two weeks for Class II buildings and four weeks for Class III buildings. Each period shall commence when all required information has been received by the Fire Wards.

2) These plans shall include a small scale, topographical drawing of the site surrounding area showing streets, access points, water sources, and other items of fire suppression interest.

3) All provisions taken to satisfy the requirements of this Code shall be certified by a professional engineer of the appropriate field, and the criteria used for each provision shall be specifically cited.

C) Certificate of Occupancy

1) Any building or occupancy which because of size or intended use is subject to this Code shall have such fire protection fully operational, and such construction as required fully constructed before the Certificate of Occupancy can be issued.

2) No building or occupancy shall be used or occupied in whole or in part, until a Certificate of Occupancy has been issued by the Fire Wards.

D. Notice of Violation

Whenever the Fire Wards observe an apparent or actual violation of a provision of this Code or other code or ordinance, a written Notice of Hazard shall be served upon the owner or other person responsible for the conditions under violation. If necessary, a time limit for the required repairs or improvements shall be listed.

E) Penalty

Any person who shall violate any provision of this Code, or shall fail to comply with any provisions thereof, shall be guilty of a violation punishable by a fine not to exceed two hundred dollars for each violation. Each day a violation continues shall be deemed a separate offense.

F) Saving Clause

The invalidity of any section or provision of this Code shall not be held to invalidate any other section or provision.

G) Inspections

The Fire Wards may inspect any Class II or Class III property with reasonable frequency to ensure compliance with this Code.

H) Existing Occupancies and Buildings

All non-conforming properties in active use when this Code is passed and adopted may continue indefinitely in their present use so long as they are not substantially renovated, or act in relation thereto.

9. To see if the town will vote to raise and appropriate the sum of \$10,167.74 for the purchase of a new Police Cruiser, or act in relation thereto.

10. To see if the town will vote to raise and appropriate the sum of \$5,000 for repairs to the Town Hall, or act in relation thereto.

11. To see if the town will vote to raise and appropriate the sum of \$3,500 to update the real estate assessments, work to be done by the State Tax Appraisers, or act in relation thereto.

12. To see if the town will vote to abandon the portion of Road No. 101 which goes from Beard Road to Weare Road, or act in relation thereto.

Article 13. To see if the town will vote to raise and appropriate the sum of \$770 for the conversion of the present Burglary Alarm System at the Town Office Building, or act in relation thereto.

14. To see if the town will vote to raise and appropriate the sum of \$5,000 to construct the septage disposal area on the Sanitary Landfill Site, or act in relation thereto.

15. To see if the town will vote to raise and appropriate the sum of \$5,000 to make major repairs to the bridge on East Colburn Road, or act in relation thereto.

16. Are you in favor of granting the Planning Board of the Town of New Boston the authority to review and approve or disapprove site plans for the development of tracts for non-residential uses or for multi-family dwelling units other than one and two family dwellings whether or not such development includes a subdivision or resubdivision of the site, or act in relation thereto.

17. To see if the town will vote to petition the Representatives and Senators who represent the town in the General Court to support in the current session of the General Court, the concurrent resolution to amend the State Constitution to limit the annual increase in property taxes to five percent and to limit the annual increase in spending by the state or any city, town or other governmental unit of the state to five percent. By Petition.

18. To see if the town will vote to raise and appropriate the sum of \$100.00 for the Conservation Commission, or act in relation thereto.

19. To see if the town will vote to authorize the Conservation Commission to retain the unexpended portion of its funds, said funds to be placed in a Special Conservation Fund in accordance with RSA 36 A5; or act in relation thereto.

20. To see if the town will vote to change the term of Fire Ward to a three-year term, or act in relation thereto.

21. To see if the town will vote to consider holding Town Meeting (articles in Warrant other than election of Town Officers) on an evening other than the regular Tuesday evening, or act in relation thereto.

22. To see if the town will vote to authorize the Selectmen to sell at public auction or administer property of the town acquired by tax deed or gift, or sell to the former owner upon payment to the town of an amount not less than the sum total of the over-due taxes plus sale and administrative expenses, plus interest on the aggregate of the foregoing, calculated at the rate of 11% per annum, or act in relation thereto.

23. To see if the town will authorize the Selectmen to apply for, receive and expend federal or state grants, which may become available during the course of the year, and also to accept and expend money from any other governmental unit or private source to be used for purposes for which the town may legally appropriate money; provided: (1) that such grants and other monies do not require the expenditure of other town funds, (2) that a public hearing shall be held by the Selectmen prior to the receipt and expenditure of such grants and monies, and (3) that such items shall be exempt from all provisions of RSA 32 relative to limitation and expenditure of town monies, all as provided by RSA 31:95b, or act in relation thereto.

24. To see if the town will vote to authorize the Selectmen to hire money to meet the necessary expenses of the town, or act in relation thereto.

25. To transact any other business that may legally come before the meeting.

Given under our hands and seal this twentieth day of February in the year of our Lord nineteen hundred and eighty-one.

THOMAS J. MANSFIELD, Chairman

MERRILL J. TODD

DONALD E. BYAM

Selectmen of New Boston

A true copy of Warrant — Attest:

ALMUS CHANCEY, Road Agent

Board of Selectmen

FINANCE COMMITTEE REPORT

The Finance Committee has met with the School Board, Selectmen, and various officials from other departments. We have reviewed the school and town budgets as well as the other warrant articles and have made the following recommendations.

SCHOOL WARRANT

1. School Budget: The committee recommends a reduction in the school budget of \$14,002.00. We feel that the tuition budget should be more consistent to the actual number of students sent to Goffstown. We reduced the projected number by six, and eliminated 2 special students no longer in the district.

2. Article to raise \$15,000.00: The committee recommends approval.

3. Article to raise \$9,000.00: We recommend approval.

TOWN WARRANT

1. Town Budget: The committee recommends a reduction of \$5,000.00 in the Highway Department budget. This reflects the normal expenditure for road oil no longer permitted for dust control.

All other amounts are recommended for approval as requested in the warrant.

2. Article of Conservation Committee: We recommend approval.

3. Article for new Police Cruiser: We recommend approval.

4. Article for Alarm System: Approval recommended.

5. Article for Library Addition: The committee again recommends approval of this article.

The members of the Finance Committee wish to thank the various departments who submitted budgets and met with us to discuss their budgets. This cooperation helps make budget analysis easier and more beneficial for all concerned.

We offer the service of this committee throughout the year to all departments regarding future budget presentations.

REPORT OF FOREST FIRE WARDEN AND STATE FOREST FIRE SERVICE

Forest Fire Prevention: Your Business, Our Business, Good Business. Forest fire prevention slogans have been seen in association with Smokey Bear since the late nineteen forties when a national effort to check the spread of forest fires was implemented.

New Hampshire residents recognized that forest fire prevention and suppression was the responsibility of every citizen, a half century before this national campaign, when our legislature established our first forest fire laws in 1903. Since that date, the State has appointed a town/city forest fire warden who is responsible for forest fire law enforcement in his municipality.

All fires kindled out of doors when there is no snow on the ground must be approved in writing by the forest fire warden before being kindled. All forest fires must be suppressed by the warden and his deputies as soon as they are reported. The cost of fire suppression is shared jointly by the town/city and the State of New Hampshire, as are forest fire prevention and forest fire training costs.

This state and local municipality cooperative forest fire program has given New Hampshire one of the best forest fire records in the United States.

WHIPPLE FREE LIBRARY ANNUAL REPORT

Year Ending December 31, 1980

"Free - America's greatest bargain - the Library." That was the National Library Week theme for 1980. Most libraries, like ours, are really "free" but as we head into the 80's it certainly is a bargain. This year the average price of a hardcover book rose well over \$10; paperbacks now cost what hardcovers used to. Magazine prices also continue to rise. As the cost of travel and entertainment spiral the library can be a town's greatest bargain. If many people can read the same bestseller, attend a movie or craft class, send their children to story hour, borrow a painting or record, this is certainly a cost effective service.

Our 800 square feet of room (about $\frac{1}{3}$ of the recommended space for a town our size) does not allow us to offer these services much as we'd like to. Our building remains cramped, dangerous and terribly energy inefficient. So the Trustees will again ask the town for a well planned, energy efficient addition so that we can expand our services to equal those offered in many other towns. Won't all these services be expensive? Not necessarily. Records, movies, paintings, photographs and film strips can be borrowed from the State. Volunteers run story hours and craft classes in many towns.

Some of the highlights of 1980: A record 109 new borrowers registered at the Library this year. We added two new encyclopedias, one new magazine and fewer books. We borrowed 170 books and magazines from the Hillstown Cooperative, many were for students of all ages who needed additional material for school projects. This is one of our most important services. The bookmobile paid three visits - unfortunately space limitations forced us to borrow fewer and fewer books each visit. In the fall the Library received a beautiful antique grandfather clock from the estate of Rachel C. Colby who was born in New Boston. The Trustees held one of their most successful book sales ever. In October Enid Spielman resigned after many years of dedicated work at the Library both as a volunteer and as assistant and school librarian. She will be missed. Louise Ellison was hired as her replacement.

Again we can thank the Friends of the Library for their faithful help. This year the new table and chairs arrived - they were badly needed and are much appreciated. The Friends major fund raiser - a new telephone directory - was delivered free to every home in town. The Friends also raised funds at their annual auction, a rummage sale, and a bake sale on election day. Almost all their money is pledged to our building fund.

The school continues to account for $\frac{1}{3}$ of our circulation and $\frac{1}{3}$ of our operating expense. Several faithful volunteers allow us to work with the school very cost effectively. Our lack of space is most apparent with twenty or more twelve year olds in the building and at the end of the year finding shelf space for the approximately 600 books usually in circulation at the school is a real challenge.

Unfortunately the Library continues to be the target of petty vandalism. The sign with our hours has been replaced over and over - now it is irreparably damaged. This year even the Christmas wreath was stolen from the door.

In 1981 please consider what the Library can mean to our town - consider our proposed addition seriously - and use this valuable service for recreation and information.

ANIMAL CONTROL OFFICER'S REPORT FOR 1980

There were sixteen "stray" dogs picked up for the Town of New Boston in 1980. Any such animal that is not claimed within a seven day period is transferred to the Animal Rescue League to be euthanized. I also received sixty calls on "dogs lost" in 1980, twenty of which were reunited with their owners.

There is an over abundant cat and dog population and so many animals are left unwanted. Have your pet spayed. Contact the Animal Rescue League of Goffstown for information on a Friends of Animals spaying certificate at a rate you can easily afford.

License your dog by May 1st. This provides your dog with a tag number that will make it easier to locate you, the owner, should the animal become lost. It will also protect your dog against rabies as the license and the rabies vaccination are renewed at the same time. Check local newspapers (in April) for the Rabies Clinic in New Boston.

Take the time to have a veterinarian check your pet. Heartworm, for example, has become a widespread and fatal disease in dogs.

Keep your dog under your control at all times. Dogs running at large have been found killing livestock, running deer, and causing property damage. To prevent problems with neighbors and to protect yourself, be a responsible pet owner.

Thank you.

NANCY M. STRONG, Animal Control Officer

AUDITORS' REPORT

The undersigned have audited the town accounts made available to us and find no major discrepancies. However, numerical identifications for all transactions to the town treasurer should be instituted by all payees. The same identification number should be annotated on each set of books so transactions can be cross checked. Presently, it is very difficult and time-consuming to conduct this portion of the audit and inaccuracies may result.

In addition, the following areas are highlighted:

(1) The State Statute limits the number of paying agents to one, and that is designated as the town treasurer. An exception has been granted for the road agent so that his payroll is paid promptly. The library is regulated by separate statute which grants a treasurer's function. However, we find more paying agents than the two exceptions and this creates a difficult auditing task.

(2) Regulations required that all payments be supported by invoices as payrolls signed by employees. We found no invoices for a majority of town poor and welfare payments and a \$12,000 expenditure (a 1979 appropriation). Also, we cannot affirm the payment of Fire Department labor as neither signed payrolls nor cancelled payment checks were found.

(3) State statutes allow towns a refund of state gasoline taxes for town owned vehicles. We could not find evidence that the police department had filed for, or received a refund.

(4) Management practices espouse that the use of overtime payments should be used for unexpected occurrences. The road agent's payroll provides for 12½% overtime at an added labor cost of 6% per year. This is over and above the unexpected overtime.

(5) State statute requires that a town must vote affirmatively for a lock-up facility. We were unable to affirm such a vote as to what amount this facility accounted for the approximate 20% overrun of the new police building.

Respectfully submitted,

CHARLES P. WASON

HOWARD F. KANE

Auditors

HEALTH OFFICER'S REPORT

The same problems reported last year continue to be present:

1. Inadequate sewage disposal systems, particularly evident in the village.
2. Septage disposal from septic tanks.
3. Lack of a town building code and occupancy permits to insure proper construction of sewage systems.

Since the State Water Laboratory has put a fee of \$15.00 for a routine water analysis, there seems to be fewer requests for bottles. I have no way of telling how much private water analysis laboratories are used or what the results of such tests might show.

In other words, not much change occurred in 1980.

SAMUEL M. BROOKS, M.D., Health Officer

NEW BOSTON PLANNING BOARD

The Planning Board met the 2nd and 4th Tuesday of each month at the Conference Room in the Town Office building. Officers for the year were Harold Strong as Chairman, Ella Daniels as Secretary, and Claire Dane as Recording Secretary-Treasurer. Mr. Thomas Mansfield filled the position of Selectmen Representative. Other members were Dr. Samuel Brooks, Mr. Walter Leach and alternate Mr. Dan Halpin.

In April, the Board regretfully accepted the resignation of Mary Towle as Recording Secretary-Treasurer. Claire Dane was appointed by the Board of Selectmen to fill the position.

FORESTRY COMMITTEE REPORT

No response from the townspeople was received by the Forestry Committee relative to the 1979 town report which indicated that there would be a possibility of individuals cutting fuelwood on town lands. Since the demand for fuelwood continues to increase and since the Agricultural Conservation and Stabilization Service has implemented a federal subsidy program to promote sound hardwood forest management and at the same time increase the supply of fuelwood to local markets, the Forestry Committee plans to apply to the program and sell about 100 cords on the Siemieze lot on Middle Branch Road.

An improvement harvest of 100,000 board feet of white pine sawlogs is planned on the Lydia Dodge lot. The cutting site is an area that was thinned in the early sixties, before the Forestry Committee was formed, which is now ready to be thinned again. The timber market at the present time is shaky and if the situation worsens before the trees are marked and the sale prepared, then the committee may decide to postpone the sale until the market improves.

If accomplished, both sales combined should generate a gross income to the town of about \$6200.

NEW BOSTON RECREATION COMMISSION

New Boston residents have the many volunteers in this great town to thank for all of the programs and activities that are offered to the children and adults alike.

The first activity of the year was the annual Celtics game at the Garden in Boston co-sponsored by the New Hampshire Parks and Recreation Society and the local Recreation Commission. Sixteen residents of New Boston traveled to this game. I'm sure it was a great evening of fun.

Last year's Winter Carnival didn't quite turn out as hoped as Mother Nature was not exactly cooperating with us. The annual Snodeo part of the Carnival had to be cancelled for the lack of snow, but the rest of the activities took place as planned. The greatest crowd ever attended the spaghetti supper in the Town Hall. It was packed with standing room only for some of Rita Manna's great spaghetti supper. Many thanks to Rita and Bill Manna and their kitchen crew. Following the supper, 1980 Winter Carnival Queen contestants Joyce Belanger (daughter of Andy and Charlotte Belanger), Mary Manna (daughter of Rita and Bill Manna), Lois Poole (daughter of David and Nonah Poole), Melissa Doll (daughter of Bill and Marilyn Doll), and Kristen Doll (also the daughter of Bill and Marilyn Doll) were called forward by Chairperson Lois Hersey. After telling a little about each contestant, Kristen Doll was presented with the crown, sash, and trophy (donated by Maurice Briere), and a gift of a ski parka. Runner-up Joyce Belanger was presented with a vest and certificate and the other contestants each received a certificate. Special thanks to Lois Hersey, Maurice Briere, and Debbie Hersey who spent many hours in judging this difficult contest. Prizes were also awarded for the games held during the day and the raffle drawing was held. Let's hope 1981 has more snow.

The winter months were quiet without much snow and the Recreation Commission showed Disney movies throughout. As these movies proved to be a loss, we will try a different approach during 1981. We will have "Old Time Movies" once a month for those lovers of Abbott and Costello, W. C. Fields, Spanky and Our Gang, etc. Watch for posters.

What youngster doesn't love candy! Each year the annual Easter Egg Hunt proves to be bigger and better than the last. It only takes about three minutes to clean the common of about 75 lbs. of tiny chocolate eggs and dozens of colored eggs.

The Americafest was held early in June this year and was a success. All ages enjoyed the games under the leadership of Loretta Caterino and her helpers. Prior to the ever-so-popular International Supper, Dwight Davis and the Linemen presented a concert in the Town Hall. The music was thoroughly enjoyed by all. The supper was a sellout as usual and those who attended sampled foods from around the world. Thanks to all of the great cooks in New Boston who donated their time and kitchens to prepare this dinner. A very special part of the Americafest came when the townspeople of New Boston honored the elementary school principal, Fred Roberts, with a check. Mr. Roberts left New Boston to become the principal of the Weare school system.

Once again the Recreation Commission sponsored the annual Bike-A-Thon. This year we had all ages from first graders to adults who participated and helped to raise \$335 for the Cystic Fibrosis Foundation. Those who collected \$25.00 or more received T-shirts. Many thanks to the 24 riders and most of all to those of you who donated to this worthy cause.

Field Day was held as usual during the last week of school and the Recreation Commission provided refreshments for the day earning nearly \$100.00.

Summer Program Director Jackie Gallup and her assistants Larry Strausbaugh, Jr. and Buddy Barss are to be commended for a job well done. Each day the playground was busy with games, crafts, and other activities held Monday through Friday, 9 a.m. to 4 p.m., free of charge. Field trips were taken to state parks this year and the bus was always filled with anxious children and chaperones eager to get to such great destinations as Franconia State Park, Sunapee State Park, Clough State Park, Greenfield State Park, Wellington State Park, Bear Brook State Park, Pease A.F.B., and the Stoneham Zoo.

An exciting part of the summer program was when the youngsters of New Boston took part in the National Hula Hoop Contest and the Frisbee Contest. Preliminaries were held in New Boston on the playground with Wannette Fales winning a chance to go on to the State Hula Hoop Contest in Exeter. Katie Houghton and Tommy Bellen represented New Boston in the State Frisbee Contest. Wannette won the hearts of all with her ability to spin more than one hoop at a time and was chosen as the New Hampshire representative in her age category to the Regional Finals. Wannette and her chaperones, Jackie Gallup and Pam Strand, traveled to Connecticut and the National Regional Finals where, in difficult competition with all older girls, she placed eighth out of 25. New Boston is so very proud of these young people.

Some of the Recreation Commission Board members attended a Fall Fitness Seminar in Bedford, N.H. at Camp Allen. Here we learned of different fitness programs available to recreation departments. Several larger departments were on hand to demonstrate and show slides of their town's fitness trails. It was a most informative and fun weekend and hopefully we can bring to New Boston some of these great ideas.

New Boston was represented in October by two teams at the State Soccer Tournament held this year in Concord. Coaches David Mudrick and Mark Kennedy took 22 youngsters to the tournament. Cheering parents and friends helped team captains Keith Holton and Scott Barss lead New Boston to a second place victory. Great going, kids!

Every goblin, ghost, and spook came out of the woodwork for this year's Haunted House. For one week the upper town hall became the scariest place in New Boston for those who dared to venture through it. A huge thank you to all those who volunteered their time and talents to help make this such a great success.

Unfortunately, the Ski and Skate sale planned for this year did not do so well as the publicity did not get out to the townspeople. We'll try again next year.

1980 ended with the annual Christmas Party. The flu kept many youngsters away this year as it was the smallest attendance ever. Those that did come were able to talk to Santa and have their pictures taken

with him and each received a gift.

The Board wishes to thank all of you who helped make these programs successful by giving generously of your time and efforts throughout the year.

Respectfully submitted,

NEW BOSTON RECREATION COMMISSION

CONSERVATION COMMISSION REPORT

The New Boston Conservation Commission in the past year has been active in the following areas:

1. Started clearing the Depot Street area in preparation for a parkland.
2. Sponsored workshop on care of woodstoves with fire department.
3. Continued plans for use of railroad lands acquired by town.
4. Annual clean-up on roadways.
5. Investigated oil pollution on roadways.
6. Investigated tree cutting on scenic roads.
7. Attended hearings on Bailey Pond.
8. Attended hearings on Gravel Removal.
9. Worked on town maps including wetlands and indexing open space land.
10. Attended workshops on acid rain, five-year Conservation Plan of the U.S. Air Force Satellite Tracking Station and the annual meeting of the N.H. Conservation Society.

REPORT OF THE SOUTHERN NEW HAMPSHIRE PLANNING COMMISSION

The Southern New Hampshire Planning Commission is a voluntary association of local governments acting together to address regional needs and priorities identified by your municipal representatives.

The Commission's member communities have many common concerns which can often be resolved more effectively and efficiently on a cooperative basis. The economies that are achieved by an areawide approach to these concerns, through Commission programs, produce substantial savings for local taxpayers by pooling their limited resources – providing members with material, data and professional services that few communities could easily afford on an individual basis.

Through the Commission's regional planning and transportation programs, a variety of reports and data are developed on an annual basis and made available to local officials to help them deal with some of their day-to-day responsibilities. Such material is often used to support locally-initiated public improvement projects, some of which can be financially assisted with State and Federal funds.

Included among the Commission's accomplishments during the past year, under our regional and transportation planning elements were:

- a "Catalog of Selected State and Local Development Permits". This document identifies the various permits that may be required, in addition to subdivision and site plan approval prior to undertaking construction in the communities;
- a draft "National Flood Insurance Program Administrative Handbook" recently edited by officials of the Federal Emergency Management Agency. Printing of the final draft is expected in 1981 to be followed by distribution to local officials;
- the review and comment on 195 funding applications, submitted by a variety of local, state and non-profit agencies and organizations, to provide or continue many projects and programs benefiting member communities and their residents;
- receipt of unconditional certification of the Commission's metropolitan area transportation planning program. This marked the first time in the 14-year history of the Commission that all prerequisites for continued federal financial assistance to implement recommended highway and public transit system improvements had been satisfied. The SNHPC is one of possibly three metropolitan planning organizations in all of New England to enjoy this distinction.

Statistical analyses undertaken as part of the metropolitan area transportation planning program, covering Manchester, Auburn, Bedford, Goffstown, Hooksett and Londonderry, were compiled in the following reports:

- “Socio-Economic Data Disaggregation - South Manchester/London-derry Sub-Area Study”;
- “Land Use Update”;
- “Population Estimates”;
- “School Enrollment”;
- “Employment Estimates”;
- “Vehicle Travel Time” - an analysis of street network efficiency.

Local Planning Assistance Services

A representative sample of staff services provided to the Town of New Boston during the past year includes:

- Provided the Planning Board with a listing of the types of industries that should be considered as potential sources of high levels of air pollution;
- Provided the Board of Selectmen, Planning Board and the Zoning Board of Adjustment with notices and schedules of the Municipal Law Lecture Series held during the fall;
- Provided copies of the Office of State Planning publication **Planning and Development Techniques, Options for Managing Growth in N.H.** for the Planning Board;
- Conducted a workshop on the U.S. Department of Housing and Urban Development’s Community Development Block Grant Program competition for fiscal year 1981 funding to which Town officials were invited;
- Provided the Central School and Whipple Free Library with copies of Commission reports, newsletters, and a variety of State and federal agency publications;
- Provided the Planning Board with samples of cluster zoning provisions for their consideration;
- Met with the Planning Board on several occasions to review outlines and procedures regarding the preparation of a master plan for the community;
- Prepare zoning ordinance, subdivision regulations, and building permit system amendments needed to continue New Boston’s eligibility to participate in the National Flood Insurance Program;
- Attended information meetings with the Board of Selectmen, Planning Board, and Conservation Commission, and public hearings on the required ordinance amendments to answer questions related to the National Flood Insurance Program;
- Provided the Planning Board with guidance concerning their procedures for handling a major development proposal;
- Provided the Board of Selectmen and the Planning Board with announcements regarding the historic district workshop conducted by the Environmental Law Clinic of the Franklin Pierce Law Center;
- Provided the Zoning Board of Adjustment with copies of the Office of State Planning publication **The Board of Adjustment In New Hampshire**;

- Provided the Whipple Free Library's architectural consultant with information on the Flood Insurance Program requirements as they might have affected an addition that was under consideration;
- Provided the Planning Board with assistance regarding the preparation of base maps to be used during the development of the master plan; and
- Prepared a statistical, socio-economic and cultural profile of the Town of New Boston including data on population, housing, land use, the economy, an inventory of transportation and community services available to residents, and pertinent planning and governmental information of interest to potential commercial and industrial developers and prospective residents.

National Flood Insurance Program

At this year's Town Meeting, you will have an opportunity to vote on some very important Zoning Ordinance amendments concerning the use of lands and the construction of buildings located within the designated special flood hazard areas. The limits of these flood hazard areas have been identified by engineering work and actual field surveys done over the past couple of years. This information, along with a series of detailed maps were published by the Federal Emergency Management Agency in the Flood Insurance Study, Town of New Boston, N.H. which is available at the Town Offices.

These regulations will apply to only the flood hazard areas. Your acceptance of these amendments will not affect any building activity in any other area of the Town, and neither will they commit any financial resources of the Town government.

If these amendments do not pass, those residents who presently carry approximately \$150,000 of flood insurance coverage under the so-called "Emergency" phase of the program will be denied renewal of their policies as they expire. We strongly urge you to support the adoption of these amendments so that affected residents and property owners will be able to obtain extended contents and building coverage at actuarial rates.

New Boston's representative on the Commission are:

| | |
|----------------------|----------------------------------------|
| Commissioners: | Dr. Samuel Brooks
Mr. Daniel Halpin |
| Executive Committee: | Mr. Daniel Halpin |

TOWN HALL COMMITTEE

The Town Hall Committee has completed its third year as an advisory committee to the Selectmen.

During this period of time, the following things have been accomplished:

1. The boiler room door has been secured.
2. Walls in boiler room repaired.
3. Emergency lights repaired.
4. Boiler inspected and passed by State.
5. The storm window installation was completed.
6. A safety survey was completed by the Fire Department.

Our recommendations to the Selectmen are as follows:

1. Winterize cellar.
2. Installation of hood and fan in the kitchen.
3. Installation of hand railings.
4. Painting of the town hall.
5. Reconditioning of upstairs hall floor.
6. Installation of grease trap in kitchen sink.
7. Cleaning debris in cellar.
8. Purchase of five tables for lower town hall.

We want to thank the people who have helped us meet our goal in returning the town hall to its rightful place in the community. We are also hopeful the townspeople will help us enforce the rules of the town hall, especially the "NO SMOKING" restrictions.

Respectfully submitted,

HOWARD TOWNE

The State of New Hampshire
NEW BOSTON SCHOOL DISTRICT WARRANT

1981
Election of Officers

To the Inhabitants of the School District in the town of New Boston qualified to vote in District affairs:

You are hereby notified to meet at the Town Hall in said district on Tuesday, the tenth day of March, 1981, at ten o'clock in the forenoon, to cast ballots from that hour of said day until seven o'clock in the evening, for the following school district officers:

1. To choose a moderator for the ensuing year.
2. To choose a clerk for the ensuing year.
3. To choose a member of the School Board for the ensuing three years.
4. To choose a treasurer for the ensuing year.
5. To choose two auditors for the ensuing year.

Given under our hands at said New Boston this thirteenth day of February, 1981.

The State of New Hampshire

To the inhabitants of the School District in the town of New Boston qualified to vote in District affairs:

You are hereby notified to meet at the Town Hall in said District on the sixth day of March, 1981, at eight o'clock in the evening to act upon the following subjects:

1. To determine and appoint the salaries of the School Board and Truant Officer and fix the compensation of any other officers or agents of the District.
2. To hear the reports of agents, auditors, committees, or officers chosen, and pass any vote relating thereto.
3. To choose agents and committees in relation to any subject embraced in this Warrant.
4. To see if the District will vote to authorize the School Board to make application for and to accept, on behalf of the District, any or all grants or offers for educational purposes which may now or hereafter be forthcoming from the state of New Hampshire and/or United States.
5. To see if the District will vote to appropriate \$25,000 for deficit spending for the 1980-81 school year for tuition cost overrun.
6. To see if the School District will vote to appropriate a sum of \$5,200 to install night set-back heating controls to balance and calibrate the existing heating system, and to overhaul burner, or act in relation thereto.
7. To see if the District will vote to appropriate \$900 for the installation of an "Enertrol" system and an electric hot water heater, or act in relation thereto.

8. To see what sum of money the District will raise and appropriate for the support of schools, for the payment of salaries of school district officials and agents, and for the payment of the statutory and contractual obligations of the District.

9. To transact any other business that may legally come before this meeting.

Given under our hands at said New Boston this tenth day of February, 1981.

REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the School Board and Citizens of New Boston

I herewith submit my 1980 Report concerning the New Boston Central School.

Having completed the first year of a new decade, those of us in education look ahead to the Eighties with a mixture of excitement and concern. A number of very important issues must be addressed jointly by educators and the members of the communities which they serve. Probably the most immediate and grave concern shared by all of us is the impact which spiralling inflation is having upon our institutions, our families, and our quality of life. The constant escalation of certain fixed budgetary costs like fuel and utilities, and the increased number of mandated special education programs and services, have forced school districts to set careful priorities in the use of discretionary monies and to streamline all programs in order to be certain that they achieve maximum cost effectiveness. The challenge to all of us is to continue to improve the quality of our educational system with diminishing available resources.

Special education costs will continue to rise as service requirements and transportation costs increase, and this fact alone will motivate school districts to provide more specialized services within the individual school and district. The key to maximizing special education services lies in collaboration among districts and in expansion of the mainstreaming idea whereby more handicapped youngsters are taught in the regular classroom setting. In order for this to be accomplished, teachers will need additional training and systematic consultant support from educational specialists.

I am certain that in the Eighties we can expect to see many more students learning about computers as well as with computers. Computers are rapidly becoming an important part of the educational environment, providing students with individualized instruction and immediate feedback, and freeing teachers to give more time to individual students. Alongside this emphasis upon technology, we may expect to see a renewed interest in the Humanities, the Fine Arts, and the Classics. While surveys indicate that most of us agree that the primary responsibility of our schools is to prepare all students in the fundamental or basic skills of reading, writing and computing, increased interest in music and the arts and greater appreciation of our cultural heritage can be expected in our schools as our leisure time increases.

School systems across the nation are presently involved in accountability programs which seek to measure pupil performance in relation to specific educational objectives developed by the school systems themselves. This approach, called criterion-referenced testing, differs from norm-referenced testing, which compares pupil performance to a national or regional norm. Each school in New Hampshire is expected to have its accountability program in operation by the end of this school year. New Hampshire school districts will use the information gained from accountability testing to improve educational programs and ser-

vices to learners. Results of the annual assessment will be made public so that the taxpayer may see the results of his/her investment in public education.

I think we will see a continued emphasis upon career education in our schools and continuing support for sophisticated vocational programs which provide adolescents with valuable job entry skills. Communities will probably emphasize adult education to a far greater degree in the Eighties, making much greater use of school libraries, laboratories, shops, gymnasiums, and classrooms. The recognition that one's education does not cease at age 18 and that learning is a life-long process will promote greater cooperation between the school and the community.

Public education in the 1980's must effectively apply existing technology in order to equip all students with the basic skills. In addition to teaching these survival skills, however, public school personnel must teach young people how to think so that they may discover and develop their own potential to a level of personal fulfillment. Schools must begin to educate youngsters for the future, preparing them to cope with and to solve complex problems not yet envisioned by us. A youngster entering first grade next fall will graduate from college in 1997, in search of a career in the 21st Century. We educators, parents and taxpayers share a great responsibility if we are to prepare young people for this challenge.

I would like to express my appreciation for the assistance and cooperation provided me by the principals, teachers, school board members, and citizens of New Boston. Without this assistance and cooperation, many of the things accomplished would have been left undone, and I look forward to another prosperous year -- a year of continued cooperation.

Respectfully submitted,

ANTONIO G. PARADIS
Superintendent of Schools
School Administrative Unit #19
Bow, Dunbarton, Goffstown,
New Boston, Weare

NEW BOSTON ELEMENTARY SCHOOL

Darrell Lockwood, Principal

American education has always relied heavily on lay control and public support. But in recent years, for numerous reasons, schools and the community have slowly but surely drifted apart. As a result, many districts are faced with a financial crisis, losing valuable programs and services, and public confidence in education continues to decline. In the 1980's both educators and taxpayers must strive to reconnect the schools and the community.

The taxpayers of New Boston over the years have faithfully provided for the needs of students and for this they should be praised. Within the New Boston Central School, children are given many opportunities to develop basic skills in the areas of language arts and mathematics, to delve into their environment through the study of social studies and science, to appreciate music, to participate in a physical fitness program, and to compete in intramural sports.

The teachers of New Boston Central School also deserve praise for their continued efforts to better themselves as well as our school, through activities such as Staff Development, Accountability, and Curriculum Development.

To every public endeavor there is a bottom line, both in cost and in effectiveness. The following statistical summary of New Boston students' Stanford Achievement Tests is submitted here to show that in partnership, the community and the school are achieving some cost-effective results.

The school and community in partnership are charged with providing children of diverse learning needs with appropriate experiences to develop as functioning and contributing members of today's changing and complex society.

Immunization Survey - 55 Recommendations

School physicals were held October 1, 1979 for all fourth graders and transfer students. A total of 51 students were examined by Dr. Albert Snay, School Physician.

In December, Grades 1 - 3 saw a filmstrip on immunization entitled "good shot".

In January, Grades 3 and 4 saw films on smoking, and discussion followed.

A Basic First Aid course was taught to 5th and 6th graders with 34 students receiving their certificates. Thirty students were the star performers in a mock school bus disaster in January.

In March, programs on puberty were held for 5th and 6th grade boys and girls. This included films followed by discussion.

Also in March, students from the Vocational-Technical Dental Program in Concord presented programs to all grades.

Nutrition continued to be one of my main concerns, and I worked closely with the teachers and cafeteria staff to improve and educate the children on good nutrition.

In May, 4th grade girls were given an introduction to feminine hygiene including a film and discussion.

Preschool registration was held the week of May 5 with 21 students registered for fall, 1980.

A preschool vision and hearing clinic sponsored by the New Hampshire Department of Health and Welfare and Little People's Depot Kindergarten was held at the New Boston Community Church on May 20, 1980. Thirty-seven preschoolers were tested.

In April, New Boston students were hit hard by the flu bug. At its worst, 19% of the students were absent.

In conclusion, my first year as school nurse proved to be exciting and rewarding with occasional frustrating moments. I want to thank all the teachers, parents, and Mary Towle for all their help and consideration given me this year.

Healthfully yours,

ANNE C. CHRISTOPH, R.N.
School Nurse

MEETING OF THE NEW BOSTON SCHOOL DISTRICT

March 7, 1980

The meeting was called to order at 8:00 p.m., by Moderator David Woodbury. The School Board led the salute to the Flag followed by prayer led by Roland Sallada.

Mr. Woodbury introduced the School Board members: Jady Judy, Chairman, Robert Normandin, Vice Chairman and Cathy Strausbaugh -- Superintendent Antonio G. Paradis, Principal Fred Roberts, and Business Administrator William N. Johnstone.

Robert Normandin, Vice Chairman of the Board, presented a certificate of appreciation to retiring Board member Jady Judy for his nine years of service to the New Boston School District.

At this time David Woodbury read the warrant to the approximately 300 voters, explained that a petition requesting a ballot vote on Article I had been received. Mr. Brensinger, an Architect representing the firm of Donald LaVallee Associates was introduced at this time.

Article I. Robert Normandin made a motion to see if the School District would vote to authorize and appropriate the sum of \$941,835 for the construction of an addition and alterations to the New Boston Central School -- including furnishings and equipment, architectural and other fees, site development and other items incidental to and necessary for such construction, and to raise said sum by the issue and sale of bonds or notes of the School District in accordance with the provisions of the Revised Statutes Annotated of New Hampshire, as amended the time and place of payment of interest, provisions of the sale of notes and/or bonds, and all other matters in connection therewith, to be left to the discretion of the School Board. Motion seconded by Jady Judy.

Everett Dicey moved the question, seconded by Linda Rollins. This motion passed by a hand vote and those present were then instructed to vote on the main motion by ballot. The polls opened at 8:15 p.m., and closed at 9:15 p.m. The vote as tallied was 264 nay - 31 yes - 1 spoiled ballot. Article I was defeated.

Article 2. A motion was made by Robert Normandin and seconded by Jady Judy to see if the School District will vote to raise and appropriate \$22,000 for the purpose of installing energy saving windows provided one-half of the cost is received through the National Energy Policy Act, Title III Program. John Bunting amended the motion as follows: \$20,000 for the purpose of installing R-19 insulation above the ceiling and to install storm windows providing one-half the cost is received through the National Energy Policy Act, Title III Program. Richard Moore seconded.

Mr. Bunting spoke for his amendment stating the heat loss through the roof could be effectively restricted by insulation measures. Selectman Tom Mansfield explained he had been to the Department of Revenue Sharing in Concord and had been informed this motion could not be amended in any way, or monies used for any other items than those stated because of the wording of the Article in the warrant and the lack of the phrase "or act in relation thereto." He had also been to the office of the Governor's Council on Energy to review the plans submitted and they contained several items not mentioned in the Article. Mr. Johnstone,

Business Administrator, spoke to this and said these were only preliminary plans and would be brought before next year's meeting as finalized. There was extensive discussion following this concerning the strength of the roof, the inadequacies of the heating system and the objections to closing up window area. The question was moved, and seconded - and passed. The vote on the amendment was defeated. Jady Judy, moved to defer this article until the end of the meeting so as to give it more thought. This was seconded and passed.

Article 3. Cathy Strausbaugh made a motion that the salaries of the School Board and other elected officers be accepted as set forth in the Series 2310 of the printed budget. Jady Judy seconded. There was confusion as to whom this Article pertained, therefore, Mr. Judy made a motion to pass over this Article until the whole budget had been presented. James Ryan seconded. The motion to pass over was defeated and the main motion was then put to a vote and passed.

Article 4. A motion was made by Jady Judy and seconded by Cathy Strausbaugh that the reports of agents, auditors, committees, or officers chosen be accepted as printed in the Town Report. A question was raised concerning Article 7 of last year's warrant and if negotiations had been carried on with Mr. Daniels. Jady Judy responded they had not because this land no longer was involved with this year's planned expansion. Howard Towne drew attention to last year's warrant and the amended Article 3, which called for a \$300,000 plan and why the Board had not carried this out. Dr. Normandin answered by saying a modified plan would have been presented under Article I if an opportunity had been given. Mr. Hersey spoke for the Finance Committee as to no knowledge of any alternate plans for expansion.

At this time Charles Wason requested that the record show an error on Page 99 of the 1980 report. The names of the auditors to read: Simone Hunter and Gary Luneau. The motion was voted on and passed.

Article 5. A motion was made by Robert Normandin and seconded by Jady Judy to pass over Article 5. The motion passed.

Article 6. A motion was made by Robert Normandin and seconded by Cathy Strausbaugh to authorize the School Board to make application for and to accept, on behalf of the District, any or all grants or offers for educational purposes which may now or hereafter be forthcoming from the state of New Hampshire and/or United States. The motion passed.

Article 7. A motion was made by Robert Normandin and seconded by Cathy Strausbaugh that the School District vote to raise and appropriate \$646,814 for the support of schools, for the payment of salaries of School District officials and agents, and for the payment of statutory and contractual obligations of the District. Dr. Normandin stated that the District is under a new accounting system and item groupings were different this year. The School Board then presented the budget and answered questions pertaining to it. John Young, Finance Committee Chairman, pointed out their recommendations and made an amendment to change the sum raised to \$632,346. Roland Sallada seconded. The amendment did not pass. Following further discussion Willard Dodge made an amendment to change the sum raised to \$641,931. This was seconded by Elliot Hersey. The amended motion passed in the affirmative.

Article 8. At this time the assembly returned to Article 2. An amended motion was made by John Bunting and seconded by Richard Moore to see if the School District will vote to raise \$11,000 and appropriate \$22,000 for the purpose of installing at least R-19 insulation above the ceiling and to install storm windows provided one-half of the cost is received through the National Energy Policy Act, Title III Program. If no money is received from matching sources, a sum not to exceed \$11,000 be raised and appropriated for the purpose of installing at least R-19 insulation above the ceilings. Before the ceiling insulation is installed the School District shall obtain an engineer's opinion as to the strength of the building. If that opinion is favorable, the work specified in this Article shall be performed. The amended motion passed.

At this time Jady Judy moved to reconsider Article 7 so as to change the figure to include the \$22,000. Cathy Strausbaugh seconded and the motion passed. A motion was then made by Robert Normandin and seconded by Jady Judy to change the figure in Article 7 to \$663,931. The motion passed unanimously.

The assembly then returned to Article 5, and Robert Normandin thanked the Building Committee for their labors.

Kevin St. John made a motion to thank the School Board for their efforts. This was acknowledged by a round of applause.

A motion was made by Emily St. John and seconded by Jady Judy to have the school budget printed in detail in the Town Report next year. The motion passed.

Adjournment: Jady Judy made a motion to adjourn the meeting at 1:15 a.m. This was carried out.

Respectfully submitted,

NONAH POOLE, School District Clerk
